Why is it important to know the Cyber Security?

Securing your organizations network is serious business. Most of the phishing attacks are carried out by bugging the system, so every organization needs to stop these bugs at the source itself. So how can you prevent these attacks? Simply, you and your organization should know the basics of Cyber Security according to the Industry Standard, Best Practices and Regulations. To develop such skills, you need guidance from Cyber Security Experts and that's were SecurWires comes in picture. Our Information and Cyber Security trainings will help you keep your systems free of malware and spam, and safe from phishers and attacks. Learn practical Cyber Security techniques to keep the bad guys at bay and make your organization stay Compliant.

How are these training sessions conducted?

We conduct inhouse or corporate training sessions and individual or group training sessions as per the requirements. We have designed a dedicated curriculum to cover different horizons of Cyber Security. We offer training through several delivery methods including On Demand (self-paced) and instructor-led both Live Online (virtual) and In-Person. Our Cyber Security courses are developed by Subject Matter Experts and Industry Leaders in numerous fields including Payment Card Industry, Network Security, Information Security, Data Security and Data Privacy, Security Operations, Cyber Security Leadership and Cloud Security.

What benefits do you get from these

sessions?

Courses are taught by real-world practitioners and experienced leaders who are the best at ensuring you not only learn the material, but that you can apply it immediately when you return to the office. Our focus is very much hands on, using real life case studies, rather than obscure sets of course notes you would probably never read again. We are familiar with a wide range of educational cultures and training techniques and focus on each class delegates as individuals.

In addition to top-notch training, we offer various certifications in ISO 27001, PCI DSS, GDPR, PDPA, HIPAA, Risk Assessment etc. SecurWires provides you CPDSI Certificate (Certified PCI Data Security Implementer) when you attend our PCI DSS training and clear the exam. These certifications will help you to showcase your readiness and preparedness for Cyber Security. We offer numerous free resources including newsletters, whitepapers, blogs and webinars.
